

**Amendments to the Specification**

Please replace the paragraph that begins on Page 27, line 20 and carries over to Page 28, line 8 with the following marked-up replacement paragraph:

— Turning now to Fig. 4, a subset 225 of the tree view 200 of Fig. 2 is shown, and pop-up windows 400, 410, 420, 430, 440 are illustrated as examples of how a user may visually define (or re-define) the organizing rules in use for the visual rendering in the tree view, according to preferred embodiments of the present invention. This example shows the user invoking a visual rule builder technique for ~~change~~ changing the organizing criteria for Development node 225, presumably to organize the node according to some criteria other than “By Rank” which is shown in node 225 as the currently-used criteria. (As will be obvious to one of skill in the art, this visual rule builder is merely representative of one technique that may be used, and other techniques may be substituted without deviating from the inventive concepts disclosed herein.) --
